

Business Management System (BMS)

Authentication & Onboarding Flow

This document illustrates the authentication and onboarding workflow for the Business Management System (BMS). It documents the user journey from login through business registration, employee invitation, and password recovery.

1. Login

Existing users sign in using their registered email address and password. First-time users can either create a new business or accept an invitation to join an existing business.

The screenshot displays the 'Create your business' onboarding interface. On the left, a sidebar for 'BMS Business Management System' lists benefits: 'Create Your Business' (a few minutes to setup), 'Takes about 2 minutes' (quick and easy setup), 'Secure & private' (encrypted data), 'You're in control' (change settings anytime), and 'Your data is safe with us' (industry-standard security). The main area shows a progress bar with three steps: '1 Business Details' (active), '2 Admin Account', and '3 Review & Confirm'. Below the progress bar, the 'Business Information' section prompts the user to provide basic information. It includes input fields for 'Business Name', 'Business Industry' (a dropdown), 'Country' (a dropdown), 'Currency' (a dropdown), and 'Time Zone' (a dropdown). A 'Continue' button is at the bottom right. The footer contains copyright information and links for 'Terms of Service', 'Privacy Policy', and 'Contact Support'.
